

VARIKUTI GOPI

2-99, WEST GANGAVARAM VILLAGE, KURICHEDU MANDAL, PRAKASAM DIST, ONGOLE, 523304, INDIA

+919398636883 | gopi.varikuti05@gmail.com | LinkedIn | GitHub

Hardworking and enthusiastic Individual with a focus on Data Science and Python Backend Development. Dedicated and committed to becoming a reliable and valuable team member, I am eager to contribute my strong foundation in Artificial Intelligence, Machine Learning, and backend development skills. With proficiency in Python and effective communication abilities, I aim to support your team as a Python Developer and contribute to meaningful, high-impact projects.

EDUCATION

GMR Institute of Technology, Rajam

2021 - 2025

Computer Science and Engineering (Artificial Intelligence and Machine Learning)

- The skills learned in a B. Tech CSE-AIML program provide me with a solid foundation to pursue career in AI and ML, whether in industry, academia, or research.

BIIT Junior Academy, Guntur

2019 – 2021

Higher Secondary Certificate | Examination Score - 96%

- MPC program provides a strong foundation for pursuing undergraduate degree in mathematics, physics, chemistry, engineering, and related fields.

INTERNSHIPS

Python Developer Intern | Indian Institute of Petroleum and Energy

Aug 2024 – Nov 2024

- Collaborated on backend development for IIPE service pages, implementing core functionality in Python to enhance page performance and user experience.
- Developed and optimized API endpoints to support data retrieval and interaction, improving efficiency and reliability across IIPE service platforms.
- Worked closely with the development team to integrate backend components, ensuring seamless functionality and alignment with project goals and requirements.

Python with Django, Hippo Cloud Pvt Ltd, Visakhapatnam

June 2023 – Aug 2023

- Contributing to the development of web applications.
- Learning the best practices of the industry.
- Work on various aspects of the software development life cycle.
- Opportunity to gain hands-on experience in web development using python.

ACADEMIC PROJECTS

Email/SMS Spam classifier

Mar 2023 – Apr 2023

- Building an SMS spam classifier involves working on Natural Language Processing (NLP) and Machine Learning techniques.
- I learned how to clean and preprocess text data, which includes tasks like tokenization, removing stop words, and stemming or lemmatization.

Smart Attendance System

Feb 2024 – Apr 2024

- Designed and implemented a real-time face recognition and tracking system to automate attendance management across multiple classrooms, integrating OpenCV and a robust face-recognition library to ensure accurate and efficient identification of students.
- Developed a user-friendly web application interface using Flask as the backend framework, handling API requests and managing database interactions. The frontend was created with HTML and CSS, offering an intuitive and accessible platform for administrators and users to view and manage attendance.

Reward Hub – Social Media Rewards Platform

Sept 2024 – Nov 2024

- Designed an admin panel for creating, editing, and managing reward posts, as well as verifying and tracking user reward claims.
- Enabled users to view, submit, and track reward claims with status updates and a dashboard for total reward points and history.

- Built RESTful APIs to handle frontend-backend interactions, ensuring efficient data management and seamless role-based functionality.

Django Student Online collaborative study Application

Aug 2024 – Sept 2024

- Developed a student-focused collaborative study platform using Django, enabling users to create, host, and participate in topic-based discussion rooms, fostering an environment of interactive learning and knowledge sharing among peers.
- Implemented robust user authentication and access control to ensure secure user registration and login, allowing users to engage safely and manage their profiles. Authentication was handled with Django's built-in authentication system, enhanced with session management for secure and seamless user experiences. Structured and managed the application database with MySQL.

CERTIFICATIONS

- Certificate Course in Machine Learning from NPTEL (*Jan 2023*).
- Certificate Course in Data Analytics from Coursera offered by Google (*Aug 2023*).
- Certificate Course in Introduction to Databases from Coursera offered by Meta (*Feb 2023*).
- Certificate Course in Programming in Python from Coursera offered by Meta (*Feb 2023*).

SKILLS & INTERESTS

- **Programming Languages:** Python, C, C++, SQL, Data Analytics, CS Fundamentals
- **Frameworks & Libraries:** Django, SQLAlchemy ORM, OpenCV
- **Web Development:** HTML, CSS, Bootstrap, RESTful APIs
- **Database Management:** SQLite, MySQL, PostgreSQL, Firebase
- **API Development & Testing:** Postman, Git, GitHub

ACHIVEMENTS

- Qualified Graduate Aptitude Test in Engineering (**GATE**) in **2024** with **AIR 5480**, demonstrating proficiency in Data Science and Artificial Intelligence (DA)

EXTRA-CURRICULAR ACTIVITIES

NCC Cadet, Guntur

Jul 2017 – Aug 2019

- Participating in NCC helped me acquire various behavioral and personal development skills.

HOBBIES

- Natural Exploration, Language Learning, Music, Cooking, Gardening.

LANGUAGES

- English - Good Working knowledge
- Hindi - Working knowledge
- Telugu - Native speaker

DECLARATION

- ❖ I hereby declare that the information provided in this resume is true, complete, and accurate to the best of my knowledge and belief.
